

# CMS Dashboards

## Product

Epicor® CMS

## Benefits

- ▶ Overall equipment effectiveness (OEE) and key performance indicators (KPIs) are in real time
- ▶ Graphic reports draw attention to trends and opportunities
- ▶ Personal views and reports are easily stored and retrieved
- ▶ Consistent and up-to-date information is available at all times
- ▶ Integration to Epicor CMS is ready to run

Most users will access their Dashboards using a Web browser, so deployment is quick and easy. Standalone desktop versions are also available for users who need to work on the road.

## Bring clarity and precision to management decision making

Getting accurate and up-to-date information about your business can be complicated and time consuming. Epicor CMS Dashboard technology cuts through the clutter of traditional reporting systems to give owners and managers a clear presentation of the key facts and trends underpinning business performance.

Dashboards are highly flexible and easy to use. Starting with high-level graphics it takes just a few mouse clicks to reveal sales and margins by product or customer. In fact, any data from your Epicor CMS system can be summarized quickly and accurately without the need for enterprise resource planning (ERP) programming.

## Production

The Production Dashboard gives plant and line managers insight into the performance of manufacturing operations. Good product and scrap rate analysis makes it easy to compare efficiency across plants and down to specific machines or individuals while equipment, labor, and materials utilization charts reveal performance trends and constraints.

## Finance

The Finance Dashboard shows aged accounts payable and receivable information, with drill-down from the balance sheet right down to individual transactions. Cash flow analysis and projections can be run at the click of a button, making it easy for financial control to assess risk and plan ahead.

## Sales

The Sales Dashboard provides detailed information on sales and marketing performance. Analysis by market sector, sales channel, delivery routes, customers, products, and territories can be displayed for any number of years, months, or periods.

## Inventory

The Inventory Dashboard analyzes historic, current, and future inventory transfers and levels to show inventory turn and aging by product, batch, or location.

## Purchasing

The Purchasing Dashboard allows users to analyze a supplier's performance, and review outstanding orders, actual delivery dates against promise, and quantities delivered against purchase orders.

## Order

The Order Dashboard reveals the performance of fulfillment operations by order status, SKU, customer, or supplier. By analyzing work steps from order entry to shipping, this tool will help identify bottlenecks and the sources of error, allowing procedures to be tuned for faster turnaround, increased accuracy, and improved customer satisfaction.

Talk with us today about how we can help you drive world-class business performance in your operations.

## About Epicor

Epicor Software Corporation drives business growth. We provide flexible, industry-specific software that is designed around the needs of our manufacturing, distribution, retail, and service industry customers. More than 40 years of experience with our customers' unique business processes and operational requirements is built into every solution—in the cloud, hosted, or on premises. With a deep understanding of your industry, Epicor solutions spur growth while managing complexity. The result is powerful solutions that free your resources so you can grow your business.
